

Are you taking prescription drugs with OTCs? You should know there could be potentially harmful drug interactions.

Combining OTC (over-the-counter) items and prescription drugs isn't always safe. In fact, thousands of Americans are hospitalized each year because of harmful drug interactions. As a **medco.com**[®] member, we have a great benefit that can help reduce your risk of adverse reactions—the automatic Drug Interaction Checker. And it's only at the **Medco Health Store**[™].

The **Medco Health Store** offers more than 22,000 *non*prescription medicines, health, wellness and personal care products and conveniently lets you order from the comfort of your home. These products are organized by the health condition they treat, so finding the important items you need is a breeze.

Feel safer with the Drug Interaction Checker

As a Medco member, once you authorize us at checkout, the Drug Interaction Checker will automatically review your prescription drug record against the OTC drugs, vitamins, and supplements in your **Medco Health Store** shopping bag. The checker runs only for the logged-in member (not family members) and will issue a warning for any potential harmful drug interactions.

To shop the **Medco Health Store** and benefit from the automatic Drug Interaction Checker, visit www.MedcoHealthStore.com/checker. Discover thousands of health, wellness, and personal care products, all at the low prices you want. Plus, standard shipping is only 99¢ on all orders.

If you aren't registered yet, signing up is simple. With your Medco member ID number on hand, go to www.medco.com, create your Medco account, and choose the *Medco Health Store* tab on the Medco home page.
