

Gain the skills you need to help your students achieve their potential on the FCAT test when you attend . . .

# ***MATH STRATEGIES FOR IMPROVING FCAT SCORES***

**Mathematics specific strategies to improve student FCAT Scores.**

In today's educational setting, the stakes are high when it comes to the results of mandated, statewide testing. Attend this powerful one-day workshop and learn . . .

- Specific strategies for teaching difficult math concepts to struggling students.
- What students must know and do when they reach a roadblock on the math portion of the FCAT test.
- How to identify what students don't know and create a plan to help them, that you can actually manage.
- Easily implemented processes to ensure student success in Math.
- Motivational tricks and tools that make an immediate difference in every student's attitude toward math.
- How to help students become better...
  - ◆ Problem solvers
  - ◆ Reason mathematically
  - ◆ Value mathematics
  - ◆ Become more confident in their mathematical abilities
  - ◆ Learn to communicate mathematically
- Changes you must make in your classroom to help EVERY student on the Math portion of the FCAT.
- How to help your students score better in JUST A FEW DAYS! (Yes days, not weeks!)

# Agenda

## Morning: Knowledge

We will begin the workshop by looking at specific questions that cause our students the most problems on the FCAT test when it comes to math. Whether your students have struggled with word problems, with algebraic concepts, or with numbers and operations, we will learn strategies to help students overcome these deficiencies. We will address the issues that arise when we work to teach various math concepts to our students who think differently and at different depths of knowledge. Additionally, we will finish the morning with a multitude of practical ideas for how to teach each of these difficult concepts to all students regardless of their varied interests and abilities.

Where do you want to be?

## Afternoon: Application and Motivation

In the afternoon, we will focus on implementation. Our conversation will focus on helping students understand what problems are asking and what the solutions will look like. We will also learn how to help students plan their work and then work their plan! This section will provide many additional strategies to help students know what to do when they reach a problem they do not understand and how to explain what they did to arrive at their conclusion. We will also address the important topic of how to help students recognize the importance of math in their lives and how to help students recognize the importance of math in their lives and how to help them become more confident in their mathematical abilities. The strategies we learn will make a difference in your class in just days—not weeks!

**These strategies will help EVERY teacher to improve their students' MATH scores—GUARANTEED!**

### Available On-Site Training includes:

- K-12 **From Adversaries to Allies** - Effective strategies for communicating with disgruntled parents.
- 3-8 **Improving FCAT Scores** - Critical strategies to dramatically improve scores!
- K-12 **Solving the At-Risk Puzzle** - Balancing the needs of all students in your classroom.
- 6-12 **Reading Across the Curriculum** - Using reading to improve student achievement.
- 1-6 **Guided Reading without Centers** - Powerful, real world techniques that strengthen any existing reading system.
