 Section A Summary of Investments
 Asset Allocation Chart as of March 31, 2014

This material is based on information obtained from sources generally believed to be reliable and available to the public, however PFM Asset Management LLC cannot guarantee its accuracy, completeness or suitability. This material is for general information purposes only and is not intended to provide specific advice or recommendation. The information contained in this report is not an offer to purchase or sell any securities.

TAB I

Summary

- Many economists attribute the relative weakness of economic data released during the first quarter to severe winter weather during the period. As temperatures warm, growth is expected to reaccelerate.
- First-quarter economic data was not weak enough to deter the Federal Reserve (Fed) from a third round of tapering asset purchases. At its meeting on March 19, the Fed reduced its monthly purchases of Treasuries and agency mortgage-backed securities by another \$10 billion to a revised total of \$55 billion per month.
- Geopolitical uncertainty caused by Russia’s annexation of the Crimean peninsula jeopardized growth in Europe and sparked a brief rally in U.S. Treasuries, which temporarily pushed yields lower. The markets quickly refocused on forward growth prospects and Fed action.

Economic Snapshot

- Fourth-quarter U.S. gross domestic product (GDP) expanded at a 2.6% annual pace, as consumer spending reached its highest level in three years. Slower-than-expected economic growth was attributed in part to the large amounts of ice and snow that blanketed the country for much of the winter. This was an improvement from the previous year, when GDP expanded by 2.0%.
- The U.S. employment situation continued to improve, as the economy created a monthly average of 182,000 new jobs in the first quarter, only slightly behind the 2013 average of 197,000. The unemployment rate has averaged 6.7% for the quarter.
- According to CoreLogic, prices for existing homes rose 12.2% year-over-year in February due to tighter supply. Although the housing market is still moving forward, sales and construction were slowed down by the winter weather.

Interest Rates

- During a press conference after the March 18-19 meeting of the Federal Open Market Committee (FOMC), Fed Chair Janet Yellen commented that the federal funds target rate could rise as soon as six months after the Fed completed its bond-buying program. However, Ms. Yellen softened her message at the end of the quarter, stating that the Fed would remain accommodative for “some time” to help those who are currently unemployed.
- The majority of FOMC participants indicated that 2015 is the appropriate time to begin increasing the federal funds target rate.
- Interest rates continued to normalize from record lows. The Treasury yield curve became more humped, as intermediate-term maturity yields rose, while short-term rates remained low and longer-maturity yields fell modestly.

Sector Performance

- Portfolios benefited from conservative duration management, as intermediate term yields surged after the March Fed meeting.
- Portfolios also benefited from the extra yield provided by holdings of corporate bonds, especially in the financial sector.
- Strong demand outpaced supply and continued to narrow yield spreads on corporate and municipal debt, which somewhat reduced their future attractiveness.

Economic Snapshot

Labor Market		Latest	Dec 2013	Mar 2013
Unemployment Rate	Mar'14	6.7%	6.7%	7.5%
Change In Non-Farm Payrolls	Mar'14	192,000	84,000	141,000

TAB II

Executive Summary

PORTFOLIO STRATEGY

- The School Board is invested in U.S. Treasury, Corporate Notes, Commercial Paper and Small Business Administration securities, bank deposits, CDARS, Money Market Mutual Fund, the Florida Prime, FEITF, the Core Funds, and the SBA Fund B.
- At quarter end the School Board's investments had a weighted average yield of 0.21% versus the Merrill Lynch 3-Month U.S. Treasury Bill Index benchmark's yield of 0.03%. The investments provided 18 basis points of additional yield over the benchmark. During the quarter, the investments generated a net income of \$129,332.32
- The duration of the investments decreased since September and ended the quarter at 0.52 years.
- The past 5 years is not a good roadmap for the next 5 years. During the past 5 years extraordinarily aggressive Fed policy has been driving bond prices higher. The advantage of holding bonds has been two-fold: interest earnings and positive price returns. As the FOMC exits their stimulus programs, the prices of bonds will almost assuredly move lower. In this transition period, the earnings advantage of holding bonds will need to be balanced against the disadvantage of periodic negative price returns.
- Investment strategies generally consist of two parts: strategic and tactical. These two parts reflect the fact that an investor's long-term evaluation of a market can be completely opposite to their short-term evaluation. Longer term PFM expects interest rates will normalize and move higher leading to capital losses, and thus our strategic plan is to keep the portfolio's duration shorter relative to the benchmark's duration. In the near term, however, we may find periods of market quiescence when the steepness of the yield offers high rolldown return, and we will capitalize on these opportunities as they arise.
- With the end of the bull market in bonds and the beginning of the bear market, or at least the anticipation of a coming bear market, investment strategy has turned defensive. PFM looks to add value through superior timing of monthly extensions intra-month, and to mitigate market downturns via tactical underweighting of interest rate exposure.
- A sea change has arrived and we aim to steer the PFM managed portfolio safely between the shoals of under-investment on the one side, and the jagged rocks of over-investment on the other. Through prudence derived from experience and being diligent in monitoring research and market conditions we strive to optimize the balance between higher income return and smaller price declines. Safeguarding principal and purchasing power are our highest goals.

Notes:

1. PFM's Market Values are used to calculate performance on the PFM Managed Investment Portfolio. Past performance is not indicative of future results.
2. In order to comply with GASB accrual accounting reporting requirements; forward settling trades are included in the monthly balances. Performance on trade date basis, gross (i.e., before fees), is in accordance with The CFA Institute's Global Investment performance Standards (GIPS).
3. Quarterly returns are presented on an unannualized basis. Returns presented for 12 months or longer are presented on an annual basis.
4. Includes the Fifth Third Institutional money market fund/cash in performance and duration computations.
5. Merrill Lynch Indices provided by Bloomberg Financial Markets.
6. End of quarter trade-date market values of portfolio holdings, including accrued interest.
7. Seven day yield as of month end is used for the SBA's Florida PRIME Fund A, FEITF, and the Money Market Funds. The yields shown above represent past performance. Past performance is no guarantee of future results and yields may vary. The current fund performance may be higher or lower than that cited. The current seven-day yield does not include realized gains and losses on the sale of securities. The yields shown above may reflect fee waivers by service providers that subsidize and reduce the total operating expenses of the Funds. Fund yields would be lower if there were no such waivers.
8. The SBA's website is the information source for Fund A's 7-day yield.
9. The FEITF's website is the information source of the 7-day yield.
10. Morningstar is the source of the CORE Funds yield and total return performance. The yield is as of May 6, 2014. They do not provide historical yield information.
11. Information provided by Bloomberg.
12. Information is from statements provided by School Board.
