

Using the Planner daily to manage time and assignments

Using Cornell Notes to organize vocabulary words and definitions to study for a test

Studying the effects of drugs and alcohol on your body

Researching various cultures around the world and comparing their lifestyles to your own

Studying the effects of carbon monoxide on the trees in the Red Wood Forrest

Writing letters to your Congressman encouraging him or her to support hybrid car tax incentives

Planting trees to increase the amount of clean oxygen and beauty in your city

Researching the structure of the tribal societies in South Africa and comparing them to the 3 levels of governments in the United States

Developing a plan and model for the roads in Winter Park to improve traffic congestion during rush hour

Discussing the impact of technology during the Agricultural Revolution

Creating a tool that will help sight impaired students read small print novels

Reading assignments by studying the pictures, reading the titles, reading the questions, and then reading the passage

Exploring career opportunities and taking tests to gauge your strengths and weaknesses

Creating a video for students new to Glenridge to learn about lunch procedures, PE uniforms, music programs, and the names of important staff members.

Interviewing a Holocaust Survivor and writing a story about their experiences.

Drinking 64 ounces of water a day for Brain Health.

Writing an essay discussing the interdependent relationship between humans and the environment.

Raising funds for cancer research.

Discussing the social impact and ethical implications of the cell phone.

Researching and giving a presentation on the inventions of Thomas Edison.

Answers: (there are many ways these can be interpreted and could be focused by the teacher through many AOI) This is the only way to get 4 per area, I think! ☺

HSE

- Studying the effects of drugs and alcohol on your body**
- Creating a video for students new to Glenridge to learn about lunch procedures, PE uniforms, music programs, and the names of important staff members.**
- Interviewing a Holocaust Survivor and writing a story about their experiences.**
- Drinking 64 ounces of water a day for Brain Health.**

ENV

- Studying the effects of carbon monoxide on the trees in the Red Wood Forrest**
- Planting trees to increase the amount of clean oxygen and beauty in your city**
- Developing a plan and model for the roads in Winter Park to improve traffic congestion during rush hour**
- Writing an essay discussing the interdependent relationship between humans and the environment**
- Researching the structure of the tribal societies in South Africa and comparing them to the 3 levels of governments in the United States**

ATL

- Using the Planner daily to manage time and assignments**
- Using Cornell Notes to organize vocabulary words and definitions to study for a test**
- Reading assignments by studying the pictures, reading the titles, reading the questions, and then reading the passage**
- Exploring career opportunities and taking tests to gauge your strengths and weaknesses**

CAS

- Researching various cultures around the world and comparing there lifestyles to your own**
- Writing letters to your Congressman encouraging him or her to support hybrid car tax incentives**
- Raising funds for cancer research.**
- Studying villages in Africa and the effects of desertification, raising funds to donate animals through Heifer Organization.**

HI

- Discussing the impact of technology during the Agricultural Revolution**
- Creating a tool that will help sight impaired students read small print novels**
- Discussing the social impact and ethical implications of the cell phone.**
- Researching and giving a presentation on the inventions of Thomas Edison.**
