

Name _____

The Googies are Coming

1. How much would 4 lean ones cost?
2. How much will 6 weak ones cost?
3. How much will 5 mean ones cost?
4. How much would 2 dirt ones and one clean one cost?
5. How much would 3 meek ones and 2 sad ones cost?
6. How much would 3 weak ones, 3 mean ones and 3 noisy ones cost?

7 -10 If the Googies came and have just \$1.00 to spend, what combinations of children can they buy? Think of 4 different combinations.
