

Welcome School Faculty!

We are pleased that your students will have the opportunity to work with the Fast ForWord products. Based on over 30 years of brain research, the Fast ForWord products have helped over 100,000 students improve reading, and language skills, helping them to become better learners.

Each computer-based product accelerates learning by developing cognitive skills, memory, attention, processing, and sequencing, Learning MAPS™. Through frequency, adaptivity, simultaneous development, and timely motivation, the FAST Power Learning formula, reading and learning improve. Results are apparent in weeks, not years.

What do the Fast ForWord family of products do for students?

- Develop reading and language skills
- Improve ability to follow directions
- Build listening skills
- Increase engagement in classroom discussions
- Generate a new excitement towards learning
- Increase self-esteem

The Fast ForWord products develop cognitive skills required to read and learn effectively. Our products are based on more than 30 years of research in neuroscience, reading, and language, and use established neuroscience principles to facilitate student learning.

What can you do to help?

To ensure that your students gain as much as possible from the Fast ForWord products:

- Ensure that students arrive on time to their Fast ForWord session every day—attendance is important!
 - Adherence with the product protocol has been shown to help students gain maximum benefit from the Fast ForWord products.
- Keep a journal of students' accomplishments and share your observations.
- Meet with each student's parents to discuss improvements.
- Support your students to ensure that they stay focused.
 - Please review the Motivation Activities sheet for additional information on motivating your students.
