

## Internet Explorer Connection Settings & Group Policy Update Procedure Quick Fix – April 1, 2005

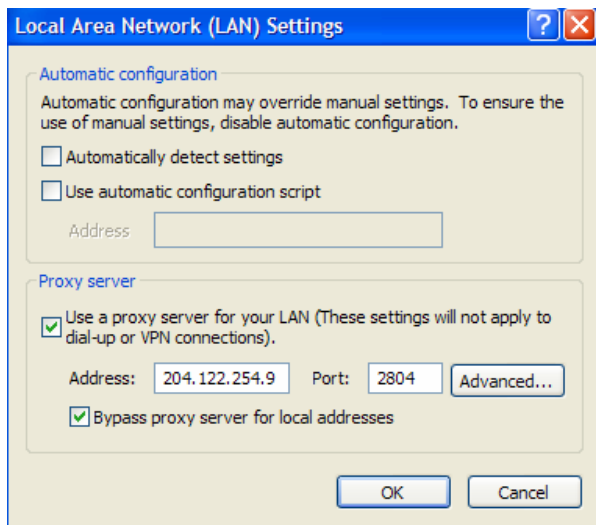

Due to a change in the Polk-fl user group, (Group Policies), many users are experiencing internet connection problems.

Checking the Internet connection settings.

1. Open Internet Explorer
2. Click on “Tools”, then “Internet Options”, then “Connections” tab
3. Click on the “LAN Settings” button

There should be a check box in the “Use proxy server...” and enter the following information for address and port.  
Address: 204.122.254.9 Port: 2804

The screen should now appear as in this example.

Click “OK” then “OK on the Internet options window.

Close Internet Explorer, then open Internet Explorer again.

Go to a web site that you have not viewed recently to insure that Internet Explorer is now working properly.
