

# Sharing Files Between Macs & PC's Over Local Area Network

## ***Setting Up the Mac for File Sharing***

1. Select sharing in System Preferences
2. Under services tab, select "Windows file sharing"(unlock button at bottom at bottom of window if necessary)
3. Under System, select accounts
4. Select Admin account, then click edit user
5. Enter Password if necessary
6. Click on "allow user to log in from windows"
7. Click OK
8. Close System Preferences
9. Restart computer

**Note:** On the Mac, files transferred from the PC can be picked up from the Users folder and files going to the PC should be placed there

## ***To Access the Mac from the PC in Windows XP***

1. Go to My network places
2. Go to Entire Network
3. Go to Microsoft Windows Network
4. Go to Workgroup
5. Go to Samba (name of computer)
6. Connect using the Macintosh Computer's User Name and Password

**Note:** Double clicking on the Samba Icon will enable PC user to move files into the Mac's User folder, or to move items in the reverse direction
